

Weekly Progress Report			
Topic:	Chatbot – Final Project	Week No.	16
Course Code:	CSST101, CSST102	Term:	1st Semester
Course Title:	Advance Representation and Reasoning Basic Machine Learning	Academic Year:	2024-2025

Main Tasks Assigned:

Perform final tests on the trained model using the test dataset
Compile final results, including performance metrics (e.g., accuracy, precision, recall)
Finalize project report

Work Completed:

We conducted final tests on the trained model using a dedicated test dataset, compiling key performance metrics including accuracy, precision, and recall.

Challenges Encountered:

We encountered discrepancies in performance metrics that required re-evaluation of model predictions and metrics computation.

Solutions Implemented:

We reviewed and corrected metric calculations to ensure a comprehensive understanding of the model's performance and reliability.

Tasks for Next Week:

We will prepare the final project presentation and ensure all project documentation is complete and organized.
