

Weekly Progress Report			
Topic:	Chatbot – Final Project	Week No.	11
Course Code:	CSST101, CSST102	Term:	1st Semester
Course Title:	Advance Representation and Reasoning Basic Machine Learning	Academic Year:	2024-2025

Main Tasks Assigned:

Select dataset for the project
Prepare and preprocess the data
Define project scope and assign roles to team members (if in a group)

Work Completed:

We developed a dataset regarding fruits and vegetables for our chatbot. We identified the project scope and assigned roles to all team members.

Challenges Encountered:

It took a lot of effort to gather data and compile the dataset.

Solutions Implemented:

We improved the data collection process by distributing work among team members and relying on trustworthy web sources.

Tasks for Next Week:

Finalize the dataset, begin preprocessing it, then start training the chatbot model.

Instructor's Feedback:
